Regarding MB 18-184

My name is Joseph Thomas, and I am the Chairman of Bountiful Blessings Broadcasting, Inc., licensee of WYAD 94.3 FM, a Low Power FM station based in Yazoo City, Mississippi, an African-American owned broadcast station.

I am in full support of the MMTC and SSR Communications FM Class C4 / 73.215 proposal to allow eligible Zone II Class A stations to upgrade in power from 6,000 Watts to 12,000 Watts.

Even though my LPFM station would not benefit directly as a result of this proposal, I know many other small broadcasters who operate Class A stations who serve their communities faithfully and need the extra power.

I have also evaluated this proposal and found no likely negative impact to my LPFM station. The benefit to the broadcasters who could upgrade is tremendous, however.

Please implement the MB 18-184 proposal fully without delay. Many small broadcasters need this relief.

Sincerely,

Joseph Thomas

WYAD 94.3 FM
